Aker Solutions to double down on energy transition opportunities after tough financial year

Aker Solutions is looking to capitalise on the "increasing pace" of the energy transition after its balance sheet took a hefty knock in 2020. The Norwegian energy services firm shared its financial results for last year on Monday, in which it slumped to pre-tax losses of NOK 1.3 billion (£111 million).

Oil services firms 'at a crossroads' as energy transition accelerates

Oil services companies can no longer delay making a choice on their future direction. Either they stick with their hydrocarbon heritage - becoming ultra-efficient and digitally enabled - or pivot towards low carbon growth, using hydrocarbons as the cash generating engine to fund the transition.

From U.S. domination to energy transition, two years that changed oil

Former U.S. Secretary of State Mike Pompeo took the stage at the world's largest energy conference in 2019 to declare an age of U.S. dominance after a decade of rapid shale development made the United States the world's top oil and gas producer. Two years later, the oil industry is recovering from the worst recession ...

“ The energy industry is in times of change: we can be your trusted partner who can help you deal with environmental challenges. We will keep you at the forefront of the energy transition revolution and ready to take advantage of the challenge of change.

Investing In 2021: The Full Realization Of The Energy Transition

Now that 2021 is officially underway, investors will be evaluating the risks and opportunities presented by an anticipated post-pandemic world and a new Biden administration. I am confident that one of the key themes of 2021 will be the heightened focus on the energy transition — the divestment away from fossil-fuel companies and the investment into clean energy opportunities.

Renewable diesel boom highlights challenges in clean-energy transition

For 17 years, trucker Colin Birch has been hitting the highways to collect used cooking oil from restaurants. He works for Vancouver-based renderer West Coast Reduction Ltd, which processes the grease into a material to make renewable diesel, a clean-burning road fuel. That job has recently gotten much harder.
